

ICS 2011  
Workshop #211

The Growing Momentum for Improved Patient Safety and Protection

Aims and Objectives

1. To expose delegates to current initiatives on different continents aimed at addressing patient safety concerns that relate to continence care 2. To update participants in new directives for patient centered outcomes research, both in the U.S. and abroad 3. To place the patient needs and perspectives in proper balance with both scientific evidence and provider experience and judgment, using the complete definition of 'evidence based health care'

Educational Value

The educational value of this workshop is one of inclusiveness so that patient perspectives can be more fully considered by society members both in their daily interaction with patients and in their research objectives and activities.
